Frontend: Angular, ReactJS, JQuery, JavaScript, Typescript, Three.js, Highcharts

Backend: Node.js, Express.js, NestJs

Databases: MySQL, PostgreSQL, MongoDB

Tools: GIT, Prisma, Postman

PROFESSIONAL EXPERIENCE

Software Developer, Javastra Technologies Pvt Ltd  07/2022 – present | Bhubaneswar, India

- Achieved a 70% increase in productivity by developing an admin panel using **Angular** and **Material UI**.
- Implemented an in-store order system with customer information storage, enhancing customer satisfaction by 30%.
- Innovated by migrating the 3D model and customization view to a more user-friendly interface using Three.js and **Angular**. Utilized **Micro Frontend** architecture in Angular, integrating the plugin with jQuery, **ReactJS** and other Angular applications.
- Developed and maintained backend services with **Node.js** and **Express.js**, ensuring efficient and scalable server-side operations.
- Led a small team to deliver a fully functional project within deadlines.

Frontend Developer Intern, Genpact India Pvt Ltd  01/2022 – 07/2022

- Analyzed user requirements and strategized the development of a 'Topic Analytics on User Views' project using **Angular**.
- Implemented different data visualization models using the Highcharts library.
- Collaborated with cross-functional teams to integrate new features and ensure seamless operations.

PROJECTS

QR Menu 

- Achieved a seamless user experience by developing a full stack 'Restaurant Ordering System' using QR code.
- Implemented the client site with ReactJS and styled-components.
- Collaborated on the backend development using Python and Django.
- Integrated Stripe Payment for processing payments.

ResGuide

- Developed a web-based restaurant/hotel guide using Express JS, NodeJS, and MongoDB Atlas.
- Adapted Cloudinary for image storage and Mapbox SDK for maps.
- Deployed the project on Heroku.
