

Comprehensive Backend and Frontend Interview Questions with Answers

JavaScript Questions (30)

1. **What is `this` in JavaScript?**

`this` refers to the object that is executing the current function.

Example:

```
```javascript
const obj = {
 name: "John",
 greet: function () {
 console.log(this.name); // "John"
 },
};

obj.greet();
...
```
```

2. **Explain event delegation.**

Event delegation is a technique where a single event listener is attached to a parent element to manage events on its children.

Example:

```
```javascript
document.getElementById("parent").addEventListener("click", (e) => {
 if (e.target && e.target.matches("button.className")) {
 console.log("Button clicked!");
 }
});
```
```
